Subject: Progress report.

Dear Danny,

It is now over 5 months that I have been wearing my PMA **and I have not had one single headache in all that time.** My quality of life has improved a million fold thanks to you and the Headache Clinic. Your father should actually be nominated for a Nobel Prize!

When I was living in Germany I had (and still have) a very close friend who, like I did, suffers from chronic headaches. She virtually cannot live without the strongest of painkillers. I have told her about my miracle cure and I think I have convinced her to come out to SA and consult the Headache Clinic. Of course her time will be limited and before she comes I will make the necessary bookings well in advance and hopefully it will be possible for her to see your dad. She will be coming to Cape Town.

Danny, I have one other question. I think I would like to have a spare PMA should my present one break or become mislaid. ( I am extremely careful with it as I regard it almost as my life's blood!). Would you please tell me what a spare would cost me.

Thanks very much and please pass on my best regards to your father.  
Best regards,  
Howie Blumenthal.
