

Having had constant headaches for many years, my mother and I approached many doctors in search for a solution, but the result was always unsuccessful (I was most commonly told that the problem originated in my sinuses). Eventually we heard about the Headache Clinic who immediately discovered the muscle tension in my neck to be the root of the problem. Since having had my PMA, my headaches have virtually disappeared, and I find myself much more disposed to go out and be active, not afraid of headaches to ruin the fun! A big thank-you to everyone at the Headache Clinic!
