To all who suffer from Headaches of any sort

Hi, my name is Doreen Turner and I am 57 years old. On the 29th October Dr Shevel did an op for me, to cure my headaches.

Well, let me tell you, I have not had a headache since.

I suffered for many many years, with the most awful migraines, sometimes being hospitalized, other times in the surgery on an intravenous injection, to relieve the most awful migraines which often went on for days.

I can't remember when I woke up without a headache; each morning was the same, headache day after day. I had little energy and was exhausted most the time.

I too, took a year to decide to do the op. You know what! I wish I had done it years ago when my family was edging me to do it.

I have so much energy now, and so much to look forward to in life,

Every morning, when I wake up, I look so forward to another fantastic day, without a HEADACHE.

Thank you Dr Shevel. You saved my life.

Much Love and Blessings,

Doreen Turner
