

Nompumelelo Gamede (my daughter) has been having these unexplained migraines for over a year. I have been monitoring her to identify the cause, but this proved too much for me since it interfered with my job (I always had to leave early to fetch her) and her studies. I took her to the headache clinic for treatment and the headaches have since stopped. I was also helped by the headache clinic in 2000, after suffering from migraine from 1980.

Thanks again

Hlobohang Gamede
