I suffered from severe headaches for almost two and half years. I never got better, but I heard about the headache clinic in Johannesburg. I came all the way travelling from Bloemfontein. I went there and everything was just so great the staff members and the doctor himself. They are very patient with us patients. The first day I went there I already felt better due to their brilliant work, I could sleep at night. We all appreciate your excellent work, every where I went I always got medication. I was very surprised to hear that they don't cure our headache's with medication. They gave me a P.M.A to put in my mouth. I couldn't believe that it would really work but it did. It's full three month's ~~now~~ now and I haven't had a headache. I would advice anyone who is having any kind of a headache to come to the headache clinic. Thank you the headache clinic my life is now back to normal, no more pain and suffering. Thank you, once again you guys are the best. Keep it up!
