**Subject:** An Interesting journey to Headache Clinic

*Att: Sylvia*

*I hope everybody is well at the Headache Clinic, also note that my wife has not complained since our trip to the Headache clinic. We had quite an interesting co-operation with staff from Accounts department up to the Nurses. This was not my first experience with the Clinic. I heard about the clinic from a friend after suffering from Headache for a long time and relying on tablets everyday. I went to the Clinic, had this friendly and hospitable staff who took me through x-rays and was given the plate (PMA). I was doubtful at first and very pessimistic on how that small plastic could drive away this tormenting headache and only to feel the magic in 24 hours (Amazing and Unbelievable). Until now I have not felt any terrible headache.*

*I got married late last year and my wife was complaining about the headaches. I told her that before July this year, Headaches will be a thing of the past for her. She could not believe me and thought I was joking, we took a journey all the way from Botswana to Jhb and still she was doubtful based on her terrible headache. We arrived at the clinic, she went through the process, and she got the plate. She cannot believe the magic, even up to now she has not complained about the Headache.*

*Lastly, I'd like to thank Sylvia Seleke for transporting us from Parktown to Krugersdorp where we were staying. We were a bit nervous because we finished a bit late and did not know where to catch the transport to Krugersdorp. She took us there and even told us not to pay, this was quite amazing.*

*Thanks a million guys and may god bless the whole team.*

*Lesley Lonkokile  
Gaborone, Botswana.*
