Subject: Re: Testimonial

Thank you very much for giving me this opportunity of testifying my recovery through the Headache Clinic. I had gone to hospitals in both Lesotho and South Africa almost every year for thirteen years, the headache would come and go. One time doctors would diagnose Migraine, the other time it would be cluster until I went to this Clinic where it was discovered that somehow the muscle is suppressing the vein that connects to the brain this resulted in the complications that caused headache. Since the past three years I have not had it I used the medication loyally and I am bold to write my testimony regarding my recovery through **THE HEADACHE CLINIC**
