

# Case study in superb service – the only one of its kind headache clinic – THE Headache Clinic (1)

Dear readers

In the past I mentioned businesses, companies or organizations in my blog posts that **deliver exceptional products or services**; organizations that literally live their mission statements or have exceptional [business plans](#) in place.

Watch this space; very soon I will be writing several blog posts about an *only one of its kind medical clinic* (the only one in the world at this point in time) that has, in my opinion, **re-written the definition of “going the extra mile”** (as regards service delivery and mission statement). No, I am wrong, not the extra mile but *millions* of extra miles!

This clinic helps people with **chronic (constant) headaches (including migraines)**. The objective is to make short work of their patients’ headaches – WITHOUT any medicine! **COMPLETE headache elimination – FOREVER**. It is a break-through the world has never seen before (the first case dating back more than 10 years with a surprise discovery by Dr. Shevel). In layman’s terms – it has been found (and PROVEN now) that headaches and migraines are located OUTSIDE the brain – mainly in the veins and muscles off the head.

The case study is my wife – who has been suffering for 18 years. CONSTANT, PERMANENT headaches and migraines... without stop or grace the headaches turned her entire life into a never ending blinding pain. Fortunately, she visited [The Headache Clinic](#) (in South Africa) the first time in middle 2009. It is a year later and for the first time in 18 years **she has NO headaches at all**. For the past 11 days **she has taken NO medicine!** We cannot describe our feelings in words.

Similar, and many, cases exist. I will explore soon my wife’s case, The Headache Clinic’s mission, the medical detail and much more. I will also feature discussions with Dr. Shevel.

Please stay tuned as I believe that every person out there, having problems with **constant headaches**, should visit this clinic – it will be THE visit in your life. It is worth the effort visiting South Africa if you are the victim of chronic headaches.

For more information in the meantime, you can visit [The Headache Clinic](#)

Please note that I do NOT receive any compensation for this article at all. If you have any questions, you are welcome to contact us at [blog@business-around-the-globe.com](mailto:blog@business-around-the-globe.com)

Warm regards

Michiel Jonker, CISA
