

# The Headache Clinic

21 February 2011

Dear Dr Shevel, and personnel specially Simone at the Cape Clinic

Thank you for the assistance we get from you during our visit at your clinic in Cape Town during January 2011.

My 10 year old boy suffered from headaches and migraines almost every day specially when he is driving in a car from ages 5 years. After doing all the test possible and visits 12 specialist in 6 years we give up on finding a permanent solution to his problem. I always carried very strong medication in my bag for the boy; I can't send him alone on any school trip.

At the end of last year we decided that your clinic is the last possible solution for the boy's problem. When we first came to your clinic I must admit that I was very doubtful of your ability to resolve the problem. However, we had no choice because we had tried everything. When my boy completes the test Simone told us that he needs a plate in his mouth. We were overjoyed with the result, the boy have not had any headaches or migraines since January. He can play cricket and rugby as much as he wants without any fear off headaches.

He lost his PMA at school 2 weeks after the school start this year, after I phone Simone in a panic, she organise us two new ones and in 2 weeks time we receive the new PMA's in Windhoek in Namibia.

Simone you are a star, we thank you for your assistance even when we was doubtful of you.
