

A TESTIMONIAL

I relocated from Secunda to Johannesburg at the beginning of last year. My daughter Kendal (14 years old) has been suffering with constant headaches about 3 months prior to this. The headaches became more severe until I finally made an appointment with our GP. She prescribed a bag full of extremely strong medication. I diligently fed Kendal this medication, but she experienced little relief. I was at my wits end until I heard about the Headache Clinic from my sister-in-law. I made an appointment and Kendal underwent a complete and thorough examination.

All possible causes were eliminated and Kendal was diagnosed as having tension headaches. I was informed of the PMD, a non-invasive, non-medicative treatment for Kendal. She was fitted with the device and after one or two adjustments to the device, Kendal was comfortable and on the way to headache-free days.

Since this treatment, Kendal has been able to enjoy holidays, fun activities with family and friends without the constant complaint of headaches.

As a parent, it was a huge relief to see my daughter happy and relaxed again. I would recommend the PMD to anyone suffering with these types of headaches.

Sincerely

Virginia Naidoo
